

DON'T GET LEFT IN THE DUST.

Your customers demand the best service, warranty and prices, but they also want to get back on the road fast. We're gearing up our inventory to include hundreds of top selling engine part numbers in stock and ready to ship, and most 'build to order' engines are only 3 days out. We're not talking 350 Chevy engines (yes, those are

in stock too), we're talking Chevy, Ford, Chrysler, Subaru, Toyota, Nissan, Hyundai, Kia, you name it.

Our transmission availability has recently almost doubled and we're stocking more transfer cases and differentials than ever. If it's powertrain, we're your 1-stop shop for the best service, quality & availability.

800.322.5859

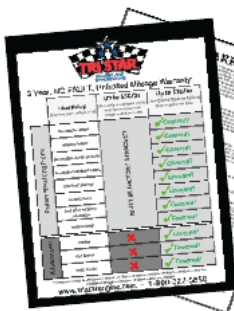

As of February 1 our **new no fault warranty supplement** is available.

This option will upgrade our already industry leading warranty to a **no fault, no hassle, no questions asked**, industry-stomping, make you do back flips, 'are you guys crazy' monster warranty. It's not fun to tell a customer their radiator hose blew off and overheated their engine, their knock sensor failed causing the engine to detonate, etc., and now you don't have to!

In addition to our new optional no fault warranty supplement we have also increased the warranty on transfer cases, differentials, and manual transmissions to our standard 3 year, unlimited mileage warranty. Call your sales rep and ask about our new warranty updates today (seriously, you should dial the number now).

**Private use vehicles under 8600 GVW. Some restrictions apply, call for the full warranty document*
